Weddington Road Bark Park

Hosted By: Barbara Corcoran

When: 2021-07-22

Located at: 8955 Weddington Rd Concord, NC 28027

From: 18:00 - 18:30

Details

Bring your pug pups (6 to 9 months old) to play with other small pups. Pugs can be prone to gaining weight that can make breathing problems worse,so it is important to keep them active and avoid any weight gain. Keeping your little one active early on with play and lots of brain-stimulating activities will help maintain a healthy weignt. Pug pups are still very small, there weight ranges between 7-12 pounds. They are still very small and very fragile so other pups are perfect for them to play with.

There are currently no additional features, in the future I do plan on enabling the location to have a link to pull up the location maps. Status is complete as per the instructions. The easy part of the assignment was setting up the EJS templates and the routes once I understood how they properly routed data/request to the controller. The major challenge I faced was making a dynamic connections page to add new connections and delete connections. After figuring out that can be completed using 2 forEach statements and If statements I was able to successfully make it dynamic.
